This type of cleaning is an engineering function and the scope of works comprises of several tasks involved in engineering, notably; - <ol style="list-style-type: none"><li>1. Assembly and dis-assembly of hoods for interceptor effluent exclusion.</li><li>2. Lowering, lifting placing of hoods and crane procedures.</li><li>3. Paint works to specified paint systems of all metallic members of the interceptor.</li><li>4. Cleaning and positioning of CPI.</li><li>5. Erection, modification and demolition of scaffolds.</li></ol> Therefore NCA is a mandatory requirement.
